Education

Fr. C. Rodrigues Institute of Technology

Bachelor of Engineering in Computer Engineering | CGPA: 9.20/10.0

Vashi, Maharashtra

Nov 2022 – May 2026

Work Experience

IISER x Suraj Informatics

Mohali, India – Remote

Project Intern

Jul 2025 – Apr 2026

- Deployed a **YOLOv11-based vision pipeline** integrating **ByteTrack** and **zone logic** for real-time **baggage counting** in high-footfall transit environments, eliminating **~80%** of manual counting effort.
- Incorporated **anomaly detection** and **live monitoring** into the inference pipeline, sustaining **95%+ tracking accuracy** under continuous operation across **10+ concurrent camera feeds**.

Sports Mentoring Infusion – NGO

Mumbai, India – Remote

Full Stack Developer Intern

Jun 2025 – Jul 2025

- Engineered **RESTful backend services** with **Node.js** and **PostgreSQL** for a task management system, automating assignment allocation for **100+ students** and cutting manual overhead by **~70%**.
- Launched **3 production modules** (class management, assignments, daily review) and automated **APK delivery**, reducing coach admin workload by **~40%** across **10+ coaches**.

IISER Mohali

Mohali, India – Remote

Project Intern

Jul 2024 – Jun 2025

- Curated and preprocessed **4 CVD datasets (5,000+ records)** and fine-tuned **ML models** (Random Forest, XGBoost), boosting cardiovascular disease prediction accuracy by **~15%** over baseline.
- Architected a **healthcare web app** with **risk prediction**, **interactive visualizations**, and **secure document uploads**; integrated **Gemini 2.5** to auto-generate plain-language clinical summaries, cutting physician review time by **~30%**.

Projects

Swabhav360 – Impact Tracking Platform | React Native, Node.js, PostgreSQL

- Architected a **cross-platform mobile app** tracking **child development milestones**, **coach inputs**, and **volunteer activities** for an NGO serving **100+ children**, eliminating **~70%** of manual record-keeping overhead.

Secure Chat Application | Python, RSA Encryption, React

- Built a full-stack chat platform with **end-to-end RSA-2048 encryption**, ensuring **zero plaintext exposure** over the network for **50+ concurrent users**. [[GitHub](#)]

Achievements

1st Place – Horizon 1.0 Hackathon

Vasai, Maharashtra

OnCampus GDSC, Vidyavardhini's College of Engineering & Technology

2025

- Built **OpsPulse**, a unified operations command center consolidating **5+ SMB tools** into a single **intelligent dashboard** with **real-time cross-functional analytics**, reducing context-switching overhead for operations teams.

3rd Place – HACK IITK 2026 (Global Cybersecurity Hackathon)

IIT Kanpur

C3iHub, IIT Kanpur

2026

- Engineered a **locally deployable LLM-powered compliance system** mapped to **NIST CSF 2.0**, ingesting policy documents via **semantic retrieval (RAG)** to surface control gaps and output a **prioritized remediation roadmap** for critical infrastructure.

Certifications

Core Java (JSE) Programming

Pinnacle Tech Programs

45 hours of intensive training

2024

- Applied OOP principles and Java fundamentals in backend service development. [[View Certificate](#)]

Deep Learning – Layers of Learning

RVTechlearn & PNT Academy

18 hours Industrial Training and Winter Internship

2024

- Implemented neural network architectures using TensorFlow; applied to cardiovascular disease prediction project. [[View Certificate](#)]

Technical Skills

Languages: Python, Java, SQL

Frontend: React.js, React Native, Tailwind CSS

Backend: Node.js, REST APIs

ML/AI: Random Forest, XGBoost, TensorFlow, Scikit-learn, YOLOv11, RAG

Databases: MongoDB, MySQL, PostgreSQL

DevOps: AWS, CI/CD, Git, Docker, Postman
